

## What is ABA STEP?

Island Therapy Solutions has created a unique transition program for adults with autism! We know learning does not stop after high school. It is important for individuals to gain independent living skills as well as employment skills to be successful in life. Our ABA STEP (Strategic Transition Enrichment Program) will work with your child to address key skills. ABA STEP has an overall program structure, but is individualized to each person.

## When does the program take place?

Program hours are from 8:30am to 3:30pm Monday through Friday.

## Where do individuals go for ABA STEP?

ABA STEP will work with individuals in our clinic as well as in the community. We are very excited to have partnered with St Croix's Governor Juan F. Luis Hospital in order to provide a rich environment for individuals to gain needed job skills.
